

An invitation to learn about

MICRO ENTERPRISE

A career option to consider for people with a disability

When people first meet, one of the questions asked is usually; “So What Do You Do?” ... we seek to give people a great answer to that question.

WHO SHOULD ATTEND

- People seeking an alternative to ADE and DES services as the only available work option
- People who are leaving school and are interested in a highly individual and fulfilling opportunity to contribute, and to be included in the economic life of your community.

WHAT TO EXPECT

Session 1 Introducing Micro Enterprise (9:30am to 12.30 pm)
this introduction presentation is open to all, will explore:

- The significance of having valued roles and contributing to your community
- The importance of work in all our lives
- The positive change in people’s lives from owning an enterprise
- How NDIS funding can support this option.

Session 2: Practical Workshop (1pm to 3pm)

This workshop session is for people who are ready to explore how a micro enterprise could work for them. We will take a deeper dive into exploring your ideas and passions as the first step and ‘discovery’ of the possibilities.

The afternoon practical workshop is specifically for people with disability, their family and allies

ATTENDANCE AT THE MORNING SESSION IS A PREREQUISITE TO ATTENDING THE AFTERNOON SESSION
